Fractional Services

Overview

Trilogy's Fractional Services offer great benefits for small to mid-size energy companies and start-ups operating in the oil, natural gas, and water markets. You may lack the resources or expertise in-house to handle tasks related to allocations, settlements, scheduling, trade capture, and other administration processes. By outsourcing these processes to Trilogy, you can improve your operational efficiency, reduce costs, and focus on your core business functions. Fractional also provides access to advanced technology and industry expertise, enabling you to remain competitive in a rapidly evolving energy market.

Trilogy's Fractional Services for plant processing and producer services offer practical and affordable options for clients who require instant online access to real-time reports and positions. With Trilogy as a partner, you benefit from our proven industry best practices, cutting-edge technologies, and innovative solutions that help optimize your operations and achieve your business objectives.

Outsourcing complex and often expensive business processes can also help you manage risk and compliance, avoid costly mistakes, and ensure that you operate in a responsible and accurate manner. Overall, partnering with experienced service providers who share your values and priorities can provide significant benefits for companies looking to optimize your operations, reduce costs, and enhance your competitiveness. Outsourcing with Trilogy can help you achieve your business objectives while delivering value to your customers and stakeholders by choosing Trilogy as your Fractional Service provider.

The Process

The first step in the process involves filling out a client intake survey to determine your needs and expectations. Based on the information provided during the intake process, Trilogy will create a proposal that outlines the scope of work, timeline, deliverables, and pricing. The scope of work will include a comprehensive list of tasks that our team will perform, along with a detailed description of the deliverables, timelines, and associated costs. Once both parties have agreed to the scope of work and a contract is signed, Trilogy will appoint a Project Manager to oversee the project and begin executing it, using a series of milestones and deliverables. Throughout the engagement, we will maintain close communication with you to ensure that the project is proceeding according to plan and that the deliverables meet your needs and expectations.

Much of our Fractional offerings revolve around gatherers and plant processors that need allocations and settlements, but we offer a wide range of services for others as well. Some of those services are listed below.

Our Core Values

Integrity

Transparency

Innovation

At Trilogy, we believe that **integrity, transparency, and innovation** are the key values that guide us in all our operations. We are committed to upholding the highest standards of integrity in all our business dealings and ensuring that we conduct ourselves with honesty, fairness, and professionalism at all times.

We believe that transparency is essential to building trust and fostering strong relationships with our clients, employees, and partners. We are committed to open communication, accountability, and providing clear and honest information about our operations, performance, and outcomes.

Innovation is at the heart of everything we do. We strive to be at the forefront of new ideas and technologies, constantly seeking new and better ways to solve problems, improve processes, and create value for our clients and stakeholders.

Our commitment to these values is reflected in everything we do, from our interactions with our clients to our internal operations and decision-making processes.

We believe that by upholding these values, we can build a strong and sustainable business that delivers value to all our stakeholders, while making a positive impact on society and the environment.

About Trilogy

Welcome to Trilogy, a leading software company that offers **Saas-based** energy solutions for mid-stream oil and natural gas operators and traders. We are dedicated to providing our clients with powerful software tools that enable them to efficiently manage their energy trading operations while reducing risks and costs.

At Trilogy, our core values of innovation, integrity, and transparency guide our actions and decisions. We believe that innovation is the key to success in the rapidly changing energy market, and we are committed to continuously developing new and better software solutions to meet our clients' needs.

Integrity is at the heart of everything we do. We believe that honesty, trust, and ethical behavior are essential for building strong relationships with our clients and partners. We are committed to transparency in all our business dealings, and we strive to maintain open communication and accountability at all times.

Our Saas-based energy software solutions include our TIES ETRM, TIES ETMS, and TIES API.

These powerful tools enable our clients to manage their energy trading and transaction management more efficiently, reduce risks and costs, and make informed decisions based on real-time data. We also offer Fractional Services where our Team manages your contract administration, settlements and invoicing, meter allocation, plant allocations, pricing and fee management and more.

We understand that our clients' success is our success, and we are committed to providing the highest level of customer service and support. Our team of experienced professionals is dedicated to helping our clients achieve their business goals and objectives.

At Trilogy, we are passionate about our work and about helping our clients succeed. We are proud of our reputation for innovation, integrity, and transparency, and we are committed to maintaining these core values in everything we do. Thank you for considering Trilogy for your energy software needs.

Welcome to a New Era of Energy Solutions.
