# Overview

The Integrated Energy System (TIES) is a cutting-edge software solution designed to revolutionize energy trade and transaction management across various segments of the energy industry. TIES caters to the unique needs of:

-  **Producers**  
Dynamic solution for Producers and those in producer services
-  **Gatherers**  
Software solution designed to meet the unique needs of natural gas gatherers
-  **Pipeline and Storage Operators**  
Manage logistical challenges, mitigate risks, and optimize profitability
-  **Plant Processors**  
Prepare plant allocation and settlement statements
-  **Marketers and Traders**  
Deal making, position reporting, trade blotter and more

# Efficient. Transparent. Reliable

---

As a Gatherer of Natural Gas, Oil, or Water, your operations demand efficiency and precision. Enter TIES, your comprehensive solution for streamlining processes and maximizing productivity. Here's how TIES supports your crucial activities:

**Contract Management:** Effortlessly manage the complexities of rates, escalations, tiered fuel deductions, date terms and renewals ensuring clarity and compliance every step of the way.

**Nominations Management:** Receive and confirm nominations from shippers through the TIES EBB, facilitating smooth communication and coordination. Optionally, auto-calculate supply side noms based on projected flows.

**Measured Volume Allocations:** Allocate measured volumes to shipper contracts using flexible allocation methods including pro rata, pro rata with swing, PDA, and more.

**Operational Balancing Agreements:** Manage operational balancing agreements with connected pipelines, ensuring visibility for scheduling and settlement.

**Imbalance Monitoring:** Monitor imbalances with real-time insights and actionable data to inform decision-making.

**Fuel & Line Loss Determination:** View and calculate fuel and line loss volumes, whether allocated fuel and/or line loss, tiered fuel calculations, or stated.

**Cash Outs:** Transact cash outs seamlessly and automatically, ensuring accuracy and timely settlements with shippers.

**Volume Statements and Invoices:** Generate volume statements and invoices and distribute them with ease, streamlining administrative processes and enhancing customer satisfaction.

**Flexible and Powerful Fee Calculation:** Calculate fees and fuel based on pressure, analysis, volume, or percentage, offering flexibility to adapt to diverse contractual scenarios.

**Curtailments:** Simply view system recommended curtailments, accept or override, and auto-notify shippers.

Additionally, TIES provides an Electronic Bulletin Board for seamless nomination submissions from shippers. Experience the TIES advantage and revolutionize your gathering and transportation operations today. Contact us to learn more about how TIES can transform your business.

# Shared Functionality Across Segments

---

TIES provides a range of shared functionalities that are essential across all segments of the energy industry, including:

## **Business Associates Administration:**

Efficiently manage business relationships with comprehensive modules for maintaining vital information, including legal details, contacts, credit parameters, and transaction history.

## **Price and Rate Administration:**

Establish and manage pricing structures for energy transactions based on published prices or custom formulas, ensuring accurate valuation and transparent pricing mechanisms.

## **Contract Administration:**

Organize and administer various types of contracts, including buy/sale, transportation, and service agreements, with features such as date-sensitive terms, automatic alerts, and document linkage.

## **Infrastructure Administration:**

Maintain and manage physical infrastructure entities and locations critical for energy transactions, including facilities, locations, interconnects, and logical locations, ensuring accurate and efficient infrastructure management.

## **Accounting Functions:**

Streamline accounting processes with comprehensive accounts payable and receivable capabilities, invoice generation, cash posting, reconciliation, and integration with general ledger systems for seamless financial management.

## **Standard APIs for Interface:**

Facilitate seamless integration with third-party software and data sources through standard APIs, enabling efficient data exchange and interoperability across diverse systems and platforms.

# Experience the Power of TIES Today!

---

TIES offers a holistic approach to energy trade and transaction management, empowering gatherers and other industry stakeholders with advanced features, robust functionality, and unparalleled efficiency. Experience the power of TIES today and unlock new possibilities for your energy operations.

Contact us now to schedule a personalized demo and discover how TIES can transform your energy operations and drive success in today's dynamic energy market.

**Comprehensive Software  
Solutions for Today's Energy  
Challenges**
